METALLURGIA — INDEX TO VOLUME 61

JANUARY — DECEMBER 1994

A

Aluminium-containing plain carbon steels ... 78
Aluminium, squeezeform, why cast or forge when you can squeeze? ... 277
ASM's 15th Heat Treating Show ... 247
Atomiser developments ... 12
Atmosphere heaters, modular, process performance uprated ... 77
Auto industry — high- and middle-tech fusion ... 129
Automotive engines, accent on ... 309

B

Bending, production, of tubular components ... 230
Burners, reheat, reducing NO_x levels from ... 257

C

Cathodoluminescence — past, present and future ... 61
Ceramics, Advanced, R&D for high-power electronics ... 280
Chemical analysis in the metals industry ... 292
Chemical hardening process ... 220
China, Electric furnace industry in, ... 107
Combustion, submerged — route to energy saving ... 260
Consolidation technology, full density products with ... 140
Continuous improvement ... 328
Contract heat-treatment, in-house *vs*; new trends in Europe ... 18
Contract heat-treatment, technical developments ... 84
Contract, testing services ... 292
Control systems — case studies ... 302
Crack and surface defect detection ... 334
Critical component manufacture improved by SPC techniques ... 25

D

Diecastings, large, low-porosity ... 197
Dust extraction equipment ... 199

E

Electric melting, advantages of ... 135
Electric melting, energy-efficient, reduces reject rates ... 60
Electric melting, giant castings with ... 239
Electric melting, investment in ... 134
Electroheat, energy savings with ... 237
Electrostatic air cleaning ... 199
Energy benefits, casting ... 133
Energy-efficiency, British Gas, Awards ... 131
Energy-efficient quality assurance of heat-treated goods, Brief for ... 217
Energy in the contract heat-treatment industry ... 209
Exposure limits, occupational, updated guidance ... 200

F

Finite Element Analysis — improved manufacturing efficiency ... 113
Flexible automation in closed-die forging ... 48
Flow forming, spinning techniques, of cast aluminium ... 110
Forging, Cold, 95 — advancing component manufacture ... 110
Forging overview system ... 341
Forgings, pressings and stampings, market in focus ... 52
Forging scene, International, and innovation — 1994 BFIA conference ... 340
Forging systems, design and optimisation, by numerical simulation ... 41
Fretting, joint venture extends research into ... 63
Friction joining, third body ... 225
Furnace, installation, rotary ... 171
Furnace modernisation, foundry, improves production ... 315
Furnace modernisation, total capability in ... 169
Furnace surveys — optimising performance and productivity ... 301
Furnaces Asia 94 ... 252
Furnaces, reheat, low NO_x – China Steel's performance ... 121

G

Gas-fired rapid heating furnace benefits ... 255
Gas-fired recuperator, high performance at low temperatures ... 254

H

Hardening and tempering, metal strip ... 89
Heat-treating titanium and stainless steels, recent developments ... 156
Heat-treatment and surface engineering forum ... 293
Heat-treatment, contract, energy in the industry ... 209
Heat-treatment from Switzerland ... 294
Heat-treatment furnace improvement, fine track record ... 162
Heat-treatment furnace, major forgings, rebuilt ... 155
Heat-treatment, monitoring from inside the product ... 305
Heat-treatment — process benefits process applications (Pt2) 210
Heat-treatment versatility, luminous wall systems shows ... 174
Heat-treatment with refractory fibres, Halcyon days for ... 158

I

Infra-red equipment solves thermal processing problems ... 156
Infra-red thermography boosts production efficiency ... 24
Investment casting mould production, improved ... 198

K

Kiln, periodic, highlights update programme ... 100

L

Ladle heating, electric, smooths foundry production ... 242
Light alloy castings, improving, with power ultrasound ... 224
Lubricants, cold metal forming, and in die lubrication ... 312

M

Machining safety regulations amended ... 316
Magnetic technique benefits foundry ... 290
Mastering metal powders ... 14
Melting/holding furnace, combined, for diecasting ... 132
Metals recovery, innovative, with "Modern Alchemy" ... 58
Metrology — SPC, developments in ... 333
Milling cell, adaptive ... 54
MMC production at Farnborough ... 15
Modelling tools, development of ... 54
Molten metal processing via the plasma arc ... 281
MTQ '94 — testing for quality ... 68

N

Nano-particulates in focus ... 274
N_2-based atmospheres, use of synthetic, ... 171
Nickel alloys, high, taking the heat ... 330
Nitrogen, non-cryogenic, reduces scaling ... 258
NVQs, new, for the casting industry ... 198

O

Optical projectors to aid quality procedures ... 226

P

Particle-reinforced aluminium, extending performance of ... 137
Particle sizing, automated ... 142
Ploughshares into profit in structural materials ... 221
"P/M 94" event reviewed ... 271
P/M industry, European, emerging from recession ... 272
P/M parts, elevated temperature system produces stronger ... 311
P/M technologies, leading edge, in focus ... 269
P/M tooling, long life ... 276
Powder forged steels, market set to grow for ... 14
Powder injection moulding of complex parts ... 275
Powder plant, special aluminium alloy ... 142
Powder production, mechanical, boosts surface engineering 273
Power ultrasound, improving light alloy castings by ... 224
Precision diecasting — control matters ... 32
Process control, what's new? ... 146
Process heat developments, international ... 123
PVD/CVD surface treatments ... 307

Q

Quenching and carburising reference ... 22

R

Rapid heating oxygen with natural gas ... 125
Recession, positive move to overcome ... 91
Recuperative burner development ... 158
Refractories, single source supplier ... 103
Regenerative melter, innovative ... 261
Research centre, leading edge of advanced casting ... 30
Residual stresses, measurement of by hole drilling strain gauge method ... 177
Retrenchment is no way forward ... 314
Rotary forging club — collaboration and technology transfer 50

S

Salt baths, modern, show process advantages ... 60
Scanning probe microscopy — new tool for surface studies.. 342
Senior fills the vacuum ... 22
Servohydraulic tester — patented control system ... 64
Sheffield Forgemasters records advances ... 205
Spin hardening monitoring system ... 214
Spinning techniques — flow forming of cast aluminium ... 110
Surge flooding provides low-distortion heat-treatment ... 158

T

Technology transfer organisation ... 59
Testing, high force, user-friendly ... 178
Thermo-mechanical fatigue of aero-engine turbine blades ... 180
Thermometers, infra-red, improve brazing process ... 304

V

Vacuum exhibitors at "Thermprocess 94" ... 170
Vacuum investments maintain heat-treat position ... 79
Vacuum pumps for critical processes ... 286

W

World P/M Congress preview ... 17

Z

Zirconia coating solves adhesion problems ... 100
Zircon flour, quality control ... 198

Supplements 1994

May 1994 issue
Carbolite — company profile (C1-15)
June 1994 issue
Forging Technology — special publication (FT1-28)
September 1994
"Furnaces Asia '94" Show Catalogue (FA1-12)
October 1994 issue
Contract Heat-Treatment Supplement (CHT1-8)
November 1994 issue
Forging Technology — special publication (FT29-44
December 1994 issue
Annual Furnaces Supplement (FUS1-??)

SUPPLEMENT INDEX

A

Aerospace heat-treatment ... C5

B

Bodycote plants, new capacity for ... CHT4

C

Camshaft forging line, semi-automatic ... FT36
Ceramics — a developing field ... C7
CHTA — Buyers Guide ... CHT7&8
Coal and coke evaluation ... C11
Communication — an essential tool for the (forging) industry's future ... FT1
Control systems ... C13

D

Determination and use of energy-load curves in forging plant selection ... FT30

F

Forge control, application of PCs in ... FT8
Forging 2000 project ... FT17
Forging Equipment Buyers Guide ... FT22-28
Forging technology, available for transfer ... FT10
Forging technology, Trend setting ... FT42

G

Gas-fired rapid heating, Applications for ... FUS1
General heat-treatment ... C4
German forging industry, The way to the future ... FT3
Glass — a special challenge ... C9
Gold and precious metals ... C11

H

Heat-treatment developments ... FUS18
Heat-treatment processes, new world of ... CHT5
High-tech, from black hole to ... CHT1
History records progress of forging machinery through the ages ... FT29
Hot and warm forging : lubricants revisited ... FT6

I

In person — Brian Benton ... FT20
In person — Peter Standring ... FT43

L

Laboratory ovens and furnaces ... C14

M

Magnetic field technology, innovative, Uniform metal heating with ... FUS8
Melting equipment and processes, New advances in ... FUS14
Metal heating, Uniform, with innovative magnetic field technology ... FUS8

R

R&D in advanced forging technology at Birmingham University ... FT38
Rolling rings and wheels, — the art and science — an update ... FT13

V

Vacuum heat-treatment, Unique concept in ... CHT4
Vacuum furnaces, New horizons in ... FUS11

METALLURGIA — INDEX TO VOLUME 61

JANUARY — DECEMBER 1994

A

Aluminium-containing plain carbon steels ... 78
Aluminium, squeezeform, why cast or forge when you can squeeze? ... 277
ASM's 15th Heat Treating Show ... 247
Atomiser developments ... 12
Atmosphere heaters, modular, process performance uprated ... 77
Auto industry — high- and middle-tech fusion ... 129
Automotive engines, accent on ... 309

B

Bending, production, of tubular components ... 230
Burners, reheat, reducing NO_x levels from ... 257

C

Cathodoluminescence — past, present and future ... 61
Ceramics, Advanced, R&D for high-power electronics ... 280
Chemical analysis in the metals industry ... 292
Chemical hardening process ... 220
China, Electric furnace industry in, ... 107
Combustion, submerged — route to energy saving ... 260
Consolidation technology, full density products with ... 140
Continuous improvement ... 328
Contract heat-treatment, in-house *vs*; new trends in Europe ... 18
Contract heat-treatment, technical developments ... 84
Contract, testing services ... 292
Control systems — case studies ... 302
Crack and surface defect detection ... 334
Critical component manufacture improved by SPC techniques ... 25

D

Diecastings, large, low-porosity ... 197
Dust extraction equipment ... 199

E

Electric melting, advantages of ... 135
Electric melting, energy-efficient, reduces reject rates ... 60
Electric melting, giant castings with ... 239
Electric melting, investment in ... 134
Electroheat, energy savings with ... 237
Electrostatic air cleaning ... 199
Energy benefits, casting ... 133
Energy-efficiency, British Gas, Awards ... 131
Energy-efficient quality assurance of heat-treated goods, Brief for ... 217
Energy in the contract heat-treatment industry ... 209
Exposure limits, occupational, updated guidance ... 200

F

Finite Element Analysis — improved manufacturing efficiency ... 113
Flexible automation in closed-die forging ... 48
Flow forming, spinning techniques, of cast aluminium ... 110
Forging, Cold, 95 — advancing component manufacture ... 110
Forging overview system ... 341
Forgings, pressings and stampings, market in focus ... 52
Forging scene, International, and innovation — 1994 BFIA conference ... 340
Forging systems, design and optimisation, by numerical simulation ... 41
Fretting, joint venture extends research into ... 63
Friction joining, third body ... 225
Furnace, installation, rotary ... 171
Furnace modernisation, foundry, improves production ... 315
Furnace modernisation, total capability in ... 169
Furnace surveys — optimising performance and productivity ... 301
Furnaces Asia 94 ... 252
Furnaces, reheat, low NO_x – China Steel's performance ... 121

G

Gas-fired rapid heating furnace benefits ... 255
Gas-fired recuperator, high performance at low temperatures ... 254

H

Hardening and tempering, metal strip ... 89
Heat-treating titanium and stainless steels, recent developments ... 156
Heat-treatment and surface engineering forum ... 293
Heat-treatment, contract, energy in the industry ... 209
Heat-treatment from Switzerland ... 294
Heat-treatment furnace improvement, fine track record ... 162
Heat-treatment furnace, major forgings, rebuilt ... 155
Heat-treatment, monitoring from inside the product ... 305
Heat-treatment — process benefits process applications (Pt2) 210
Heat-treatment versatility, luminous wall systems shows ... 174
Heat-treatment with refractory fibres, Halcyon days for ... 158

I

Infra-red equipment solves thermal processing problems ... 156
Infra-red thermography boosts production efficiency ... 24
Investment casting mould production, improved ... 198

K

Kiln, periodic, highlights update programme ... 100

L

Ladle heating, electric, smooths foundry production ... 242
Light alloy castings, improving, with power ultrasound ... 224
Lubricants, cold metal forming, and in die lubrication ... 312

N

Nano-particulates in focus ... 274
N_2-based atmospheres, use of synthetic, ... 171
Nickel alloys, high, taking the heat ... 330
Nitrogen, non-cryogenic, reduces scaling ... 258
NVQs, new, for the casting industry ... 198

O

Optical projectors to aid quality procedures ... 226

P

Particle-reinforced aluminium, extending performance of ... 137
Particle sizing, automated ... 142
Ploughshares into profit in structural materials ... 221
"P/M 94" event reviewed ... 271
P/M industry, European, emerging from recession ... 272
P/M parts, elevated temperature system produces stronger ... 311
P/M technologies, leading edge, in focus ... 269
P/M tooling, long life ... 276
Powder forged steels, market set to grow for ... 14
Powder injection moulding of complex parts ... 275
Powder plant, special aluminium alloy ... 142
Powder production, mechanical, boosts surface engineering 273
Power ultrasound, improving light alloy castings by ... 224
Precision diecasting — control matters ... 32
Process control, what's new? ... 146
Process heat developments, international ... 123
PVD/CVD surface treatments ... 307

Q

Quenching and carburising reference ... 22

R

Rapid heating oxygen with natural gas ... 125
Recession, positive move to overcome ... 91
Recuperative burner development ... 158
Refractories, single source supplier ... 103
Regenerative melter, innovative ... 261
Research centre, leading edge of advanced casting ... 30
Residual stresses, measurement of by hole drilling strain gauge method ... 177
Retrenchment is no way forward ... 314
Rotary forging club — collaboration and technology transfer 50

S

Salt baths, modern, show process advantages ... 60
Scanning probe microscopy — new tool for surface studies.. 342
Senior fills the vacuum ... 22
Servohydraulic tester — patented control system ... 64
Sheffield Forgemasters records advances ... 205
Spin hardening monitoring system ... 214
Spinning techniques — flow forming of cast aluminium ... 110
Surge flooding provides low-distortion heat-treatment ... 158

T

Technology transfer organisation ... 59
Testing, high force, user-friendly ... 178
Thermo-mechanical fatigue of aero-engine turbine blades ... 180
Thermometers, infra-red, improve brazing process ... 304

V

Vacuum exhibitors at "Thermprocess 94" ... 170
Vacuum investments maintain heat-treat position ... 79
Vacuum pumps for critical processes ... 286

W

World P/M Congress preview ... 17

Z

Zirconia coating solves adhesion problems ... 100
Zircon flour, quality control ... 198

Supplements 1994

May 1994 issue
Carbolite — company profile (C1-15)
June 1994 issue
Forging Technology — special publication (FT1-28)
September 1994
